

VSCDA

REPLICA CAR ACCEPTABILITY GUIDELINE

Replica cars are not normally accepted for racing in VSCDA events.

In rare circumstances, VSCDA may accept a high quality replica car because we wish to promote the sights and sound of vintage and historic racing. VSCDA will seriously consider exact replicas when the owner requests, and the owner fully documents the specifications, the origin of manufacture, the date of manufacture, and all the details of the components, suspension, frame, and body of the car to be considered. VSCDA will review the supplied information before making a decision.

Replicar acceptance will normally be either 1) for a single event, or 2) permanent. This will depend on the rarity of the original car, upcoming featured manqué events, or any other circumstance which might provide the unique opportunity for replicas to race wheel-to-wheel at VSCDA events.

Partial replicas such as a Speedwell Sprite, WSM Sprite, or Lotus 7 or 11, for example, will not normally be accepted. To be accepted, the replica should meet the full specification of the original design including all components, the suspension, the frame, the wheels, the body (i.e. everything).

The “request to race a replica” should be received more than 60 days before the first desired race event. Application for acceptance should be sent to the VSCDA Car Preparation Steward.
